“Slicing Edge” Sharpening Systems

▶ **Put that “Slicing Edge” Back On
All Your Blades!**

2012 Catalog

**We are the Manufacturers of Slicing Edge
Sharpening Systems.**

**We can custom make any size up to 8 inches and as
thin or wide as you need.**

Guaranteed not to harm your blade.

Easy to use.

Will sharpen thousands of blades.

Great for polishing & Restoring your blades.

The Best Systems Around!

The "Slicing Edge" Sharpening System is a fast and easy way to get a Slicing Edge on any knife, scissors or tools.

This system puts a smooth, beveled finish on every blade. It will polish your silver and brass on your knives. It will also take off your blood stains on the blade and restore your knife back to its

original finish. Each set consists of two compressed boards. These boards are made of special material that are almost dust free. The buffing wheels with use turns to a silk or velvet touch. This is what created a smooth finish on your blades. The kit also comes with a supply of grit, goose grease and rouge. There is enough to sharpen over a thousand blades and detailed instructions. If you run out of the recondition kit you can buy another one for a low price and have your set back to new for a fraction of the cost.

Family Owned:

Our company is family owned and operated. This system has been around for over 30 years. We recently bought the company and have made tremendous improvements in our instructions, packaging and shipping methods. We strive to provide excellent customer service and satisfaction. If for any reason you need help or additional ideas on how to use our product we are here Monday- Friday 1-6 pm to help you. We have a Toll Free number for your convenience.

Why use Slicing Edge Sharpening Systems?

- Fast and easy to use
- Use it on almost any blade.
- It will Sharpen your carving and turning tools.
- Made of compressed board, inexpensive and will not deteriorate.
- The composite wheels will not come apart like rock wheels can.
- The wax on the wheels keeps the knife cool and this saves the temper in the blade.
- Excellent for polishing and restoring blades back to new again.
- Just recondition the wheel and they are as good as new.
- Unlimited help, Support & Warranty Toll Free at 1-866-305-5690
- Detailed instructions.
- You can even view short films on the web or purchase a full length instructional DVD for other ideas and sharpening tips.
- No other system offers as much informative material and customer support.

dealer!**

220 & 400 Grit What is the Difference?

We now carry two applications of grit to be applied on our sharpening systems.

The 220 grit is for sharpening knives and for putting a proper bevel on.

The 400 grit is a finer grit that is excellent for sharpening scissors and for polishing the blade and taking scratches out. We recommend having both grit wheels if you want to change them out to do finer detail on your blades.

There is so much you can sharpen and polish with these systems that you can not do with ordinary sharpening systems. Our sets can clean, sharpen polish and even put your tips back on your blade if broken. These are just a few of the many things you can accomplish with our "Slicing Edge" Sharpening System. If you use them for other uses please call us we would love to hear about it and add it to our list of uses.

So many Wheel Sizes. Which do I choose?

Our wheel systems come in a variety of sizes from 4 inches to 8 inches in diameter by 1/4 to 2 inches or more in width. For More that 1 1/4 inch please call for custom prices.

The smaller wheels such as the cordless drill size are great for in the woods and when you cannot use your bench grinder. You just need to strap it down and you can sharpen your small knives.

The medium sizes are great for all bench grinders and the smaller size bench grinder. This size allows you to leave your guards on your grinder and use the mechanical degrees for your knife sharpening to set the proper angle.

The larger sizes are to allow for better capability and movement of using wheels with larger knives and tools.

The smaller width of the systems makes it easier for small tools. The wider systems are better for wider the blade.

Price: \$1.00
Part # B1000
Bushing set for
converting wheels
from a 5/8 to 1/2
Bench Grinder

**The bushings are to
convert the 5/8 hole

wheel 3 or more
times.**

Stanford Outdoors

Rouge So many Choices which one do I choose?

If you are not for sure which rouge to choose from, we recommend the basic re-conditioning kit with white Jewelers Rouge.

We recently added the Black Magic & Pink Rouge. These rouges are more for Knife Makers and those who want a more detailed polish.

The White Rouge is for buffing of all your blades.

The Pink, Red & Green Rouge is a finer polish.

The Black Magic Rouge is for a mirror shine and to finish the blade.

We sell individual sizes of our Rouge, lube (Wax) and grit.

Accessories

The individual sizes of 2 oz grit will re condition your wheels three or more times.

Each grit wheel will sharpen thousand of blades.

The individual size of Goose Grease (Wax) 4- 5 years. It should outlast the amount of times you re- condition your wheels.

The individual size of rouge will last 300-400 times of sharpening.

Our bushings are for converting your wheels from a 5/8 arbor hole to 1/2 inch to fit on both sizes of bench grinder.

The UA-1 Adapters are for the small 4 inch wheels sets. These adapters allow for using the wheels on your cordless drill.

Our DVD is a full length instructional movie showing how to sharpen your knives, scissors, axes, broad heads and more. The instructor also shows polishing techniques and how to re-condition your wheel systems.
